

The Need: How you can help Save Georgia's Hemlocks

There is a need for funds to keep the work going, and the best way you can help is to donate to the Save Georgia's Hemlocks campaign. Our fundraising goal is \$385,000: enough to ensure the first five years of operation for the bio-control lab at the University of Georgia.

Update June 2009: Thanks to the generosity of the Turner Foundation matching all donations up to \$75,000, we were able to meet our initial goal!

You can help keep the lab going even longer by making a donation to this historic effort.
